Census tract 9800 in Lincoln-Lemington-Belmar was not included in this analysis due to significantly higher levels of income and a small population, which skewed the remaining data. Because of the way the Census bureau collects and collates data, numbers within a chart may not add to 100%. Numbers of households and population may also vary slightly from one indicator to another.

Industry and Occupational information and projections are only available at the ZIP code level, so these sections reflect a slightly different geographic area than other data in the report. See below for a ZIP code map.
